ACRONYMS & ABBREVIATIONS

Outlying Landing Field

PFAS per- and polyfluoroalkyl substances

- Further investigation is underway because of previous uses of firefighting foam at OLF Santa Rosa.
- The Navy is following the well-established federal statutory/regulatory environmental cleanup process for assessment of and response to PFAS releases.
- 4 on-base areas have been identified as confirmed or potential PFAS release areas.
- Findings are documented in a Preliminary Assessment Report, which will be completed in 2021 and available in the Administrative Record: http://go.usa.gov/xAEQF.

LEGEND

- Confirmed PFAS release area
 - Potential PFAS release area
 - Runways

- Installation boundary
- Surface water

Off-Base PFAS Drinking Water Investigation

OLF Outlying Landing field

PFAS per- and polyfluoroalkyl substances

The Navy needs your help to sample your drinking water well.

- The sampling area includes properties within
 1 mile in the direction of groundwater flow from the installation boundary.
- Although the runways were not identified as potential release areas, they were used to determine the sampling area to be conservative.
- If your drinking water is provided by East Milton Water System, the Navy does not need to sample your water.
- The Navy may expand the sampling area based on the results of the current sampling of drinking water wells.

LEGEND

- Confirmed PFAS release area
- Potential PFAS release area
- Runways
- Installation boundary
- Surface water

- → Estimated groundwater flow direction
- Potential groundwater flow direction under pumping conditions
- Designated sampling area boundary
- Designated sampling area
